

## EMMO

'EMMO' is a powerful diagnostic software tool designed to run on a PDA or smartphone. EMMO is used by monitoring officers to extract and display detailed status information from all OM247 monitoring equipment. It can also be used in remote survey mode with an **OM247-FIT** to identify any nearby tags and to display their tamper-status details.

### Key Features

- Password-protected access
- Encrypted communications
- Detailed equipment tamper-status information
- Remote survey mode
- Compatible with all OM247 monitoring equipment  
(OM247-MU, PID, TRAK and SOLO)
