

Secure Trax

G4S SECURE SOLUTIONS (USA)

Secure Trax integrates G4S' proprietary reporting technologies to provide clients with multi-faceted reporting and real-time communication throughout the security program.

G4S Security Officers use Secure Trax to log incidents, track post coverage and provide clients with actionable information for immediate use. Secure Trax also provides random verification of officer locations, a discreet and silent panic button and communications among personnel via phone calls and text messaging.

Secure Trax

GPS Tracking

Allows the location of the device to be recorded in real-time while patrols and complete movement history is available to the client.

Geo-Fencing

Capable of creating a virtual, or geo-fence, around the property a security officer is assigned to patrol. If an officer exceeds the perimeter, an alert will be sent to the appropriate personnel.

Guard Tours

Using Near Field Communication (NFC) technology, Secure Trax tours are conducted at regular intervals and locations are inspected at each tour stop based on customer requirements. Notifications are distributed to supervision if tours are not completed within the allotted time.

Office Check-In / Out

Allows for immediate check-in via the Check-In/Out module. Discrepancies result in an immediate notification sent to the appropriate personnel to ensure quick and proper action is taken.

Daily Activity Reports

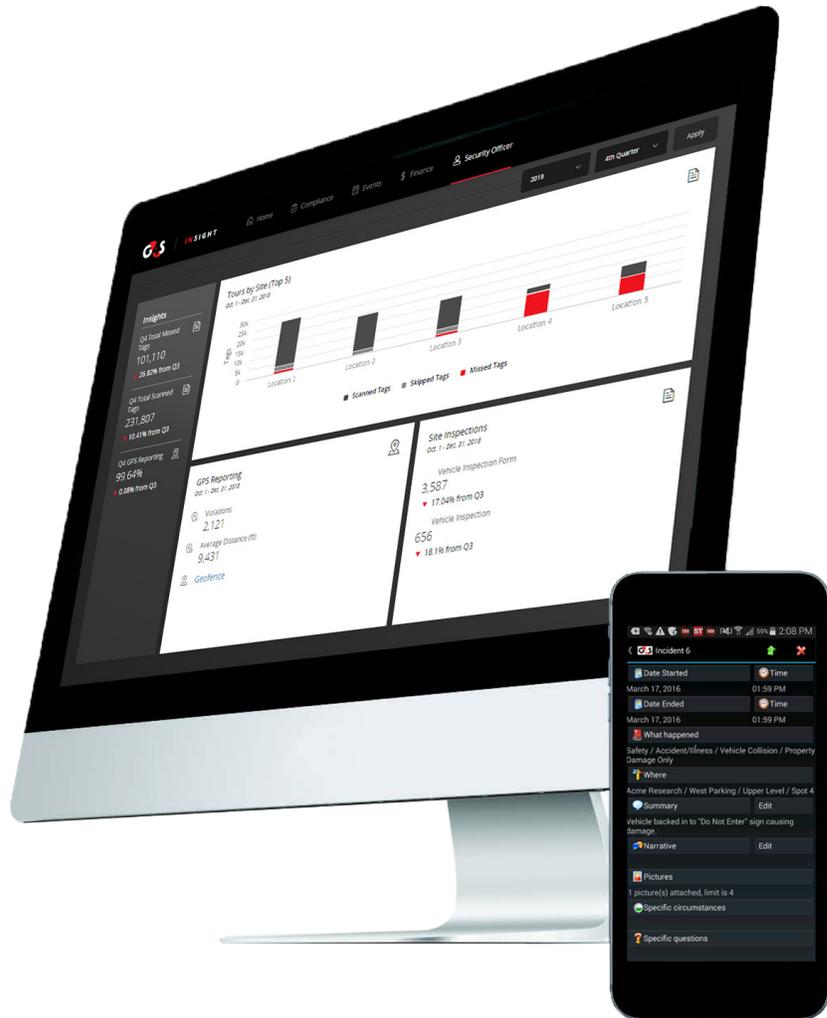

All shift activities are logged, including visitor assists, patrols, scheduled and random equipment inspections and incident responses. All logs are compiled into a daily activity report (DAR).

Inspections

G4S Security Officers are able to collect valuable data based on customer specifications within the inspections module.

Events

Events are reported in real-time, including information on the location and classification with alerts sent to account stakeholders.

About G4S Secure Solutions (USA)

Whether your location is local or global, involves extensive customer interaction or significant security challenges, G4S Security Officers are prepared to meet your business' specific safety and security needs. All G4S Security Officers are recruited and carefully screened according to their talents, qualifications, experience, temperament and background.

G4S' experience-based security officer programs gives you the flexibility to select the right type of officer for your specific security and customer-service requirements. All G4S Security Officers are trained by our award-winning and ISO-certified North America Training Institute (NATI).
